Question 1

Correct

Mark 1.00 out of 1.00

Flag question

Given an array of N integer, we have to maximize the sum of $arr[i] * i$, where i is the index of the element ($i = 0, 1, 2, \dots, N$). Write an algorithm based on Greedy technique with a Complexity $O(n \log n)$.

Input Format:

First line specifies the number of elements- n

The next n lines contain the array elements.

Output Format:

Maximum Array Sum to be printed.

Sample Input:

5

2 5 3 4 0

Sample output:

40

Answer: (penalty regime: 0 %)

```
1 #include<stdio.h>
2 int main(){
3     int n,temp=0,sum=0;
4     scanf("%d",&n);
5     int a[n];
6     for(int i=0;i<n;i++){
7         scanf("%d",&a[i]);
8     }
9
10    for(int i=0;i<n;i++){
11        for(int j=i+1;j<n;j++){
12            if(a[i]>a[j]){
13                temp=a[j];
14                a[j]=a[i];
15                a[i]=temp;
16            }
17        }
18    }
19
20    for(int i=0;i<n;i++){
21        sum=sum+(a[i]*i);
22    }
23    printf("%d",sum);
24 }
```

| | Input | Expected | Got | |
|---|--|----------|-----|---|
| ✓ | 5 2 5 3 4 0 | 40 | 40 | ✓ |
| ✓ | 10 2 2 2 4 4 3 3 5 5 5 | 191 | 191 | ✓ |
| ✓ | 2 45 | 45 | 45 | ✓ |

| | | | | | |
|--|---|--|--|--|--|
| | 3 | | | | |
|--|---|--|--|--|--|

Passed all tests! ✓

Correct

Marks for this submission: 1.00/1.00.
